Dave started and is currently the President of Heeler Solutions an Independent Sales Rep firm for Manufacturers and Service Providers. Heeler Solutions represents client solutions directly to End Users and develops Sales Channels for the following markets

- Exploration & Production (E&P)
- Water Treatment
- Waste Disposal and Remediation
- Environmental Health & Safety Industries (EHS).
- Environmental Monitoring
  - Remote Device Monitoring and Control
  - Custom Web Based Solutions

Daves past work experience brings a unique blend of Service, Product and Capital Equipment sales, both direct to the End Users and thru the Channel.

In the Exploration & Production market Dave has spearheaded MSA agreements and work orders direct with major Gas Producers involving services ranging from Well Site Services, Closed Loop Solids Control, Field Services, Emergency Response and Disposal Services. While working with thermal distillation technology companies such as Aquatech and Altela Dave helped to develop and represent fixed and mobile water treatment services for the Shale Gas industry which included pretreatment systems, thermal distillation units and crystallizers for the treatment of flow back and produced waters.

Dave also brings a strong background in water treatment sales experience including roles at Nalco Chemical and US Filter then transitioning to the Waste Management arena with sales and management positions with companies such as USPCI and Clean Harbors. Dave has also held Senior Sales and Marketing positions with one of the largest RCRA-permitted commercial water treatment disposal facilities in the U.S.

Dave received his BS in Biology from Clarion University of Pennsylvania, and started his environmental career conducting fisheries research work with the Pennsylvania Fish Commission as-well-as environmental studies with Kidde Consultants as a water quality biologist.
